

“Innovation 2.0 in a Knowledge-based Society”
The 2nd Mobile Government Seminar China
“知识社会与创新2.0” 第二届中国移动政务研讨会
23 Nov. 2008, Peking University, Beijing, China

Open Source and Innovation 2.0

开源创新与创新2.0

陈绪 博士

Intel公司开源战略经理

23 Nov 2008

Open Source is mainstream today

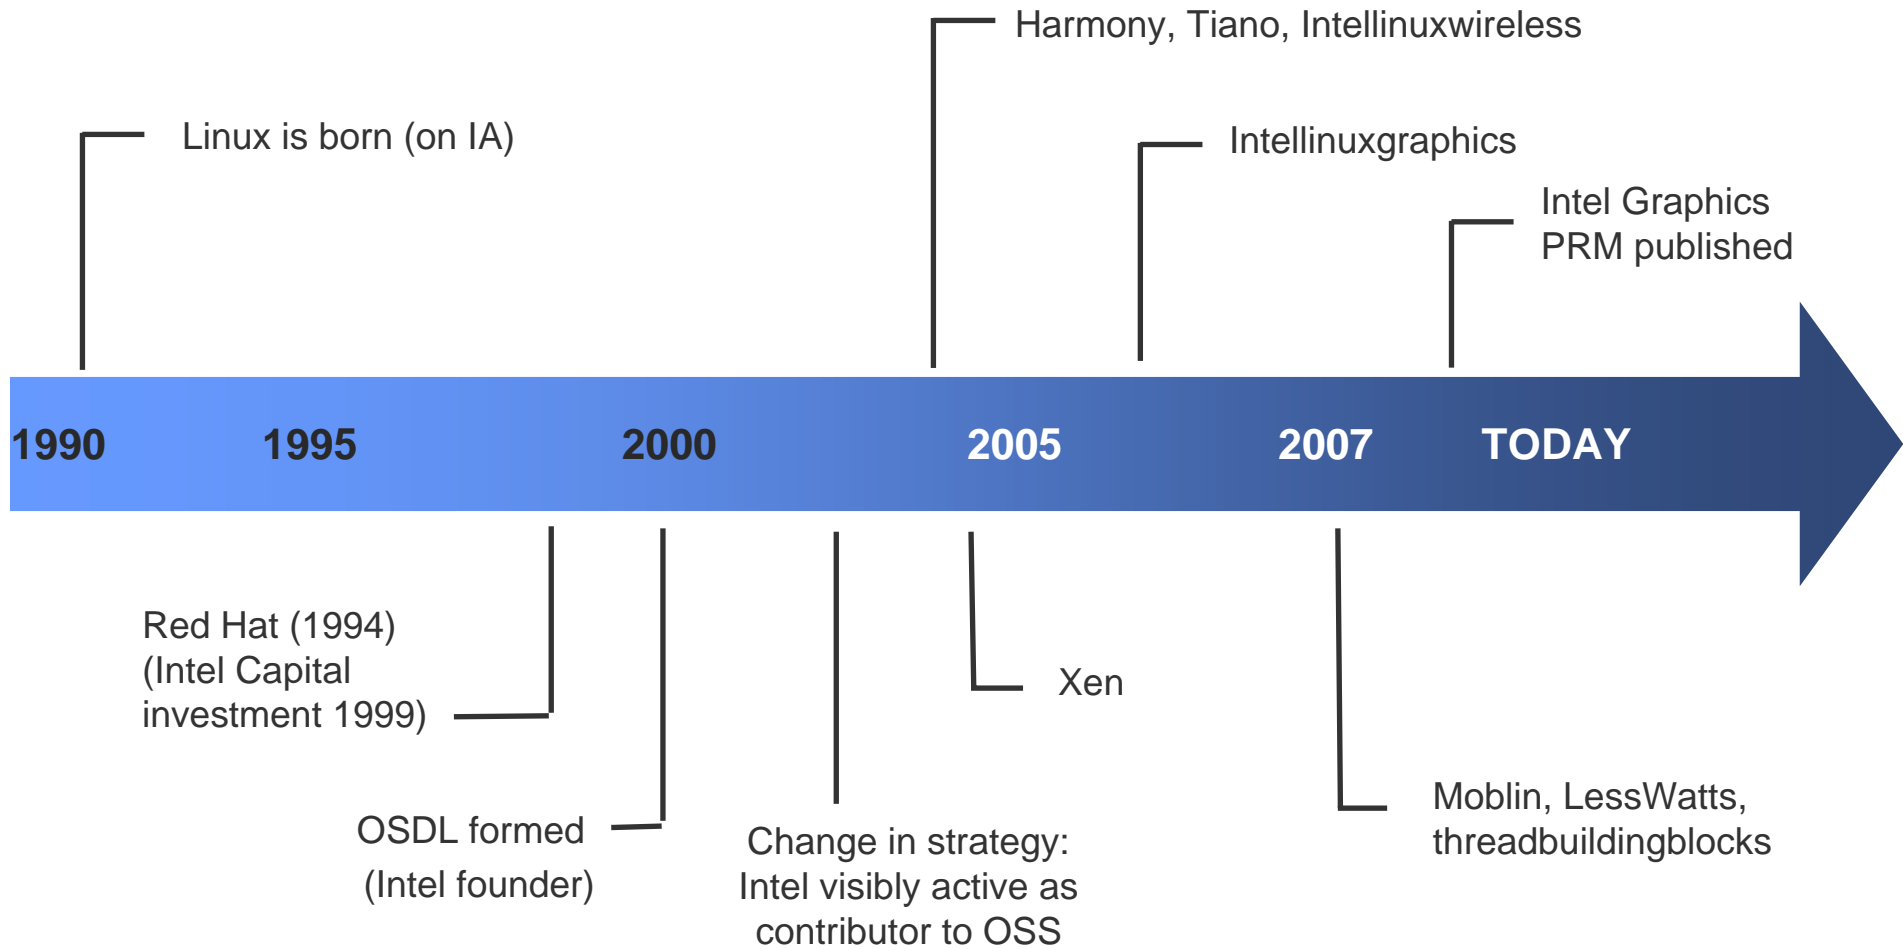

Then

Now

Intel's involvement has increased over time

Innovations at all layers of software

*Other names and brands may be claimed as the property of others.

Open Source @ Intel: People

- Sr. Technologists
- SW Architects
- Maintainers
- SW Engrs.
- Founding members, board of key foundations
- Sales & Marketing

**Investing in Technologists, Architects and Engineers
with Strong OSS Competency**

Community Influence

"Intel in particular has improved wrt open source a lot, and for that reason I tend to suggest that when buying a machine, just make sure that you buy one with Intel graphics and wireless. That takes care of the two biggest annoyances right there."

– *Linus Torvalds, Linux Creator*

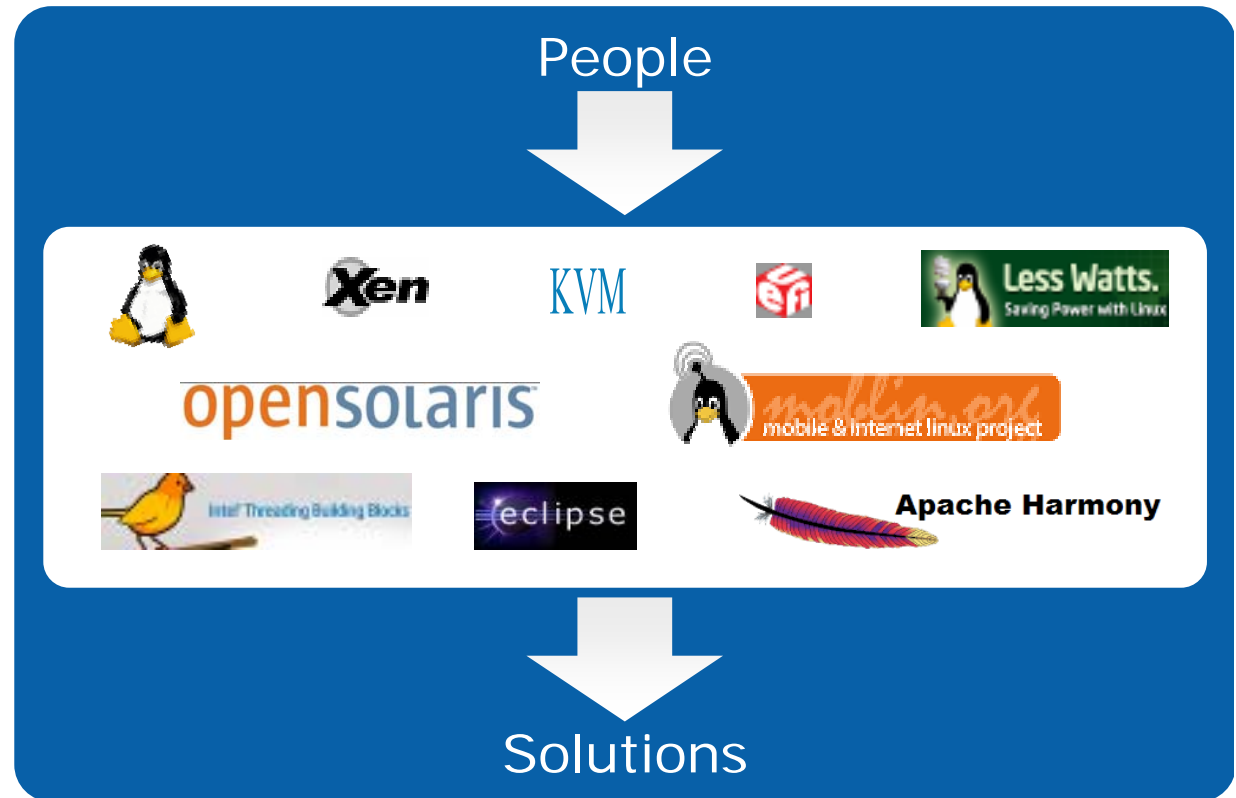

"Of the big vendors I deal with I would say Intel are probably the most co-operative today, they provide good documentation, errata information and also fund or write key drivers for their hardware such as the 3D support (done by Tungsten Graphics) and the wireless. That has really paid off and made their systems hardware of choice."

- *Alan Cox, Community*

Open Source @ Intel: Projects

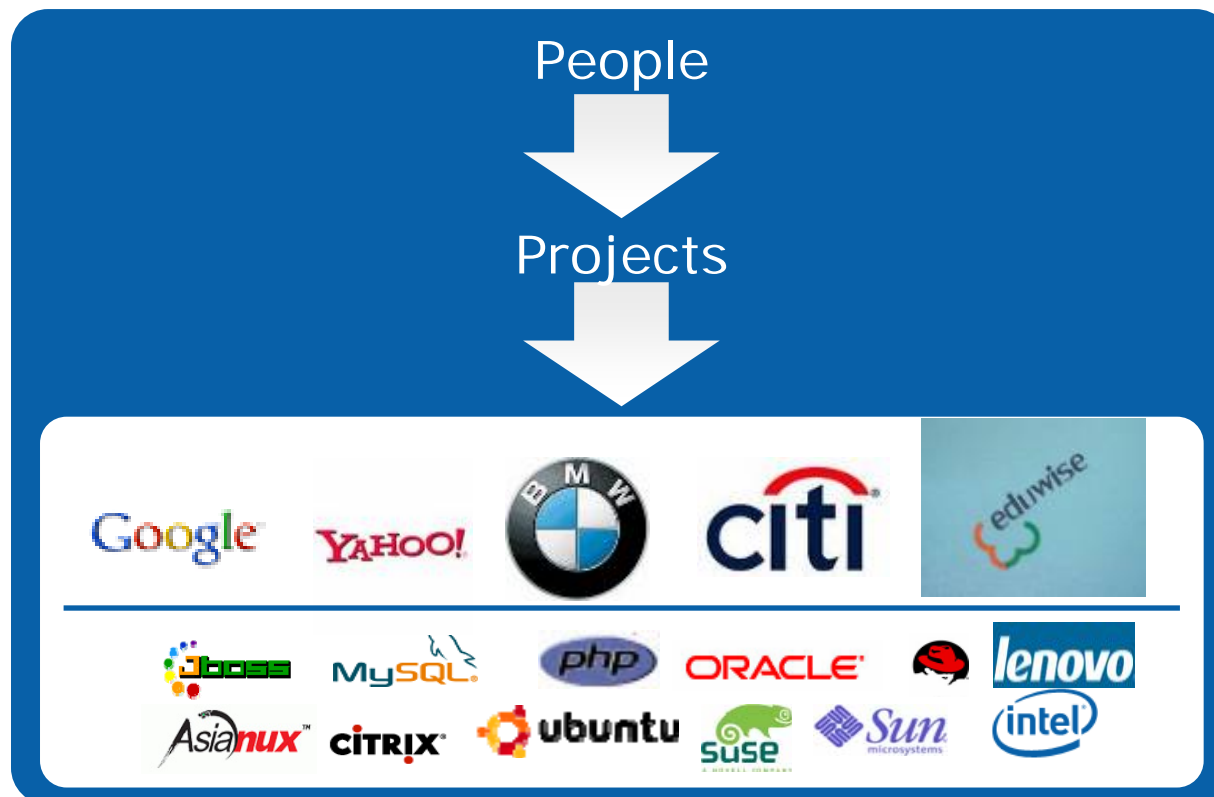

- High Performance
- Low Power
- Virtualization
- Parallelism
- Graphics
- Wireless

Contributing and Leading Key OSS Projects aligned with Advanced Intel® Technologies

Open Source @ Intel: Solutions

- Datacenter
- Web services
- Education
- Mobile Internet (Moblin.org)
- & more...

Working With the Ecosystem to Make Choice of Solutions Dependable and Widely Available

Local OSS effort in China

OSV/ISV

- Linux OSV
- ISV Partner
- Software enabling

Education

- SJTU/Tsinghua
- OS symposium

OSS Community

- ChinaUnix.net
- Linuxpk.com
- Skyeeye
- AKA
- Chinese Kernel community

OSS Media

- Open Source E-magazine
- CSDN

Open Source Technology Center in China

People: Over 100 engineers, community manager...

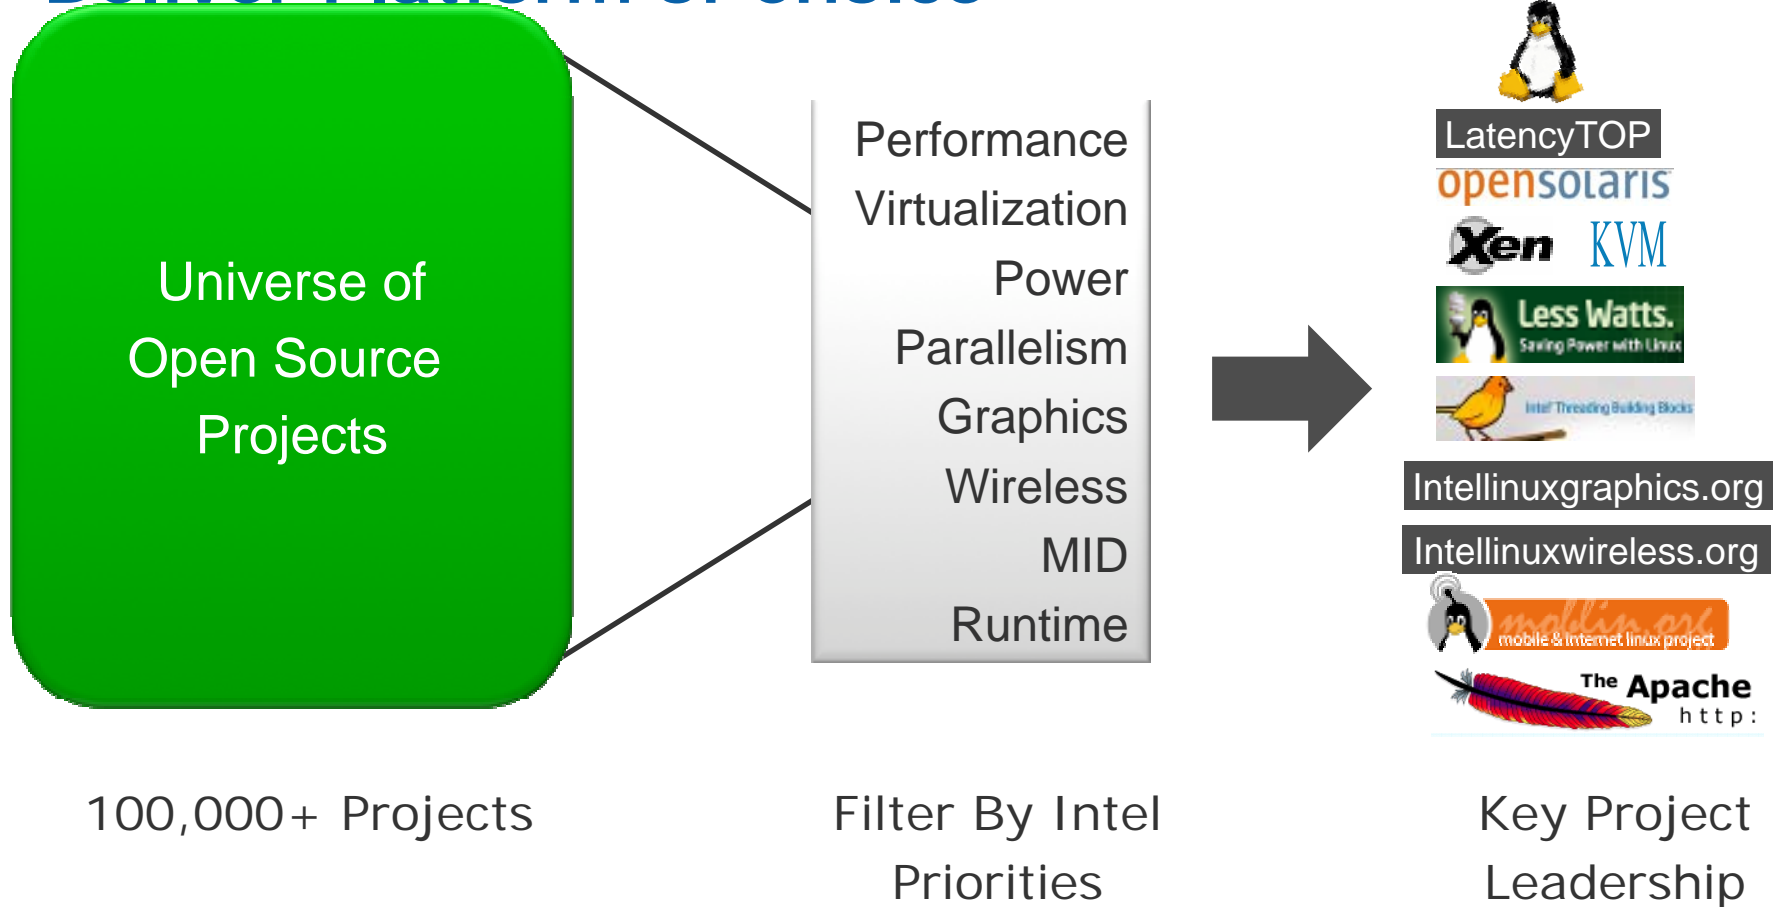

Focused Projects: Xen/KVM, Moblin, Linux Kernel, Linux device drivers, OpenSolaris.....

Dates and plans subject to change
Software and Solutions Group

Intel has Leadership Presence in OSS to Deliver Platform of Choice

New Growth Opportunity: Atom/Moblin.org

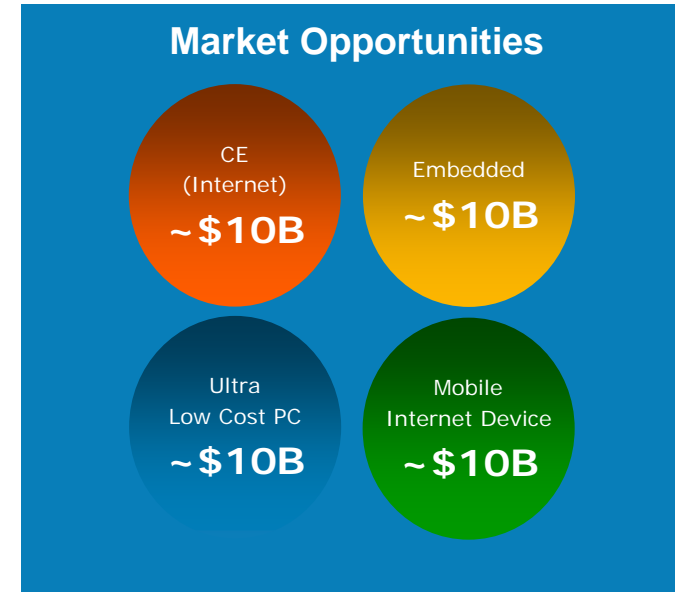

Mobile Internet Device

Simple and affordable device for internet-centric usage models?

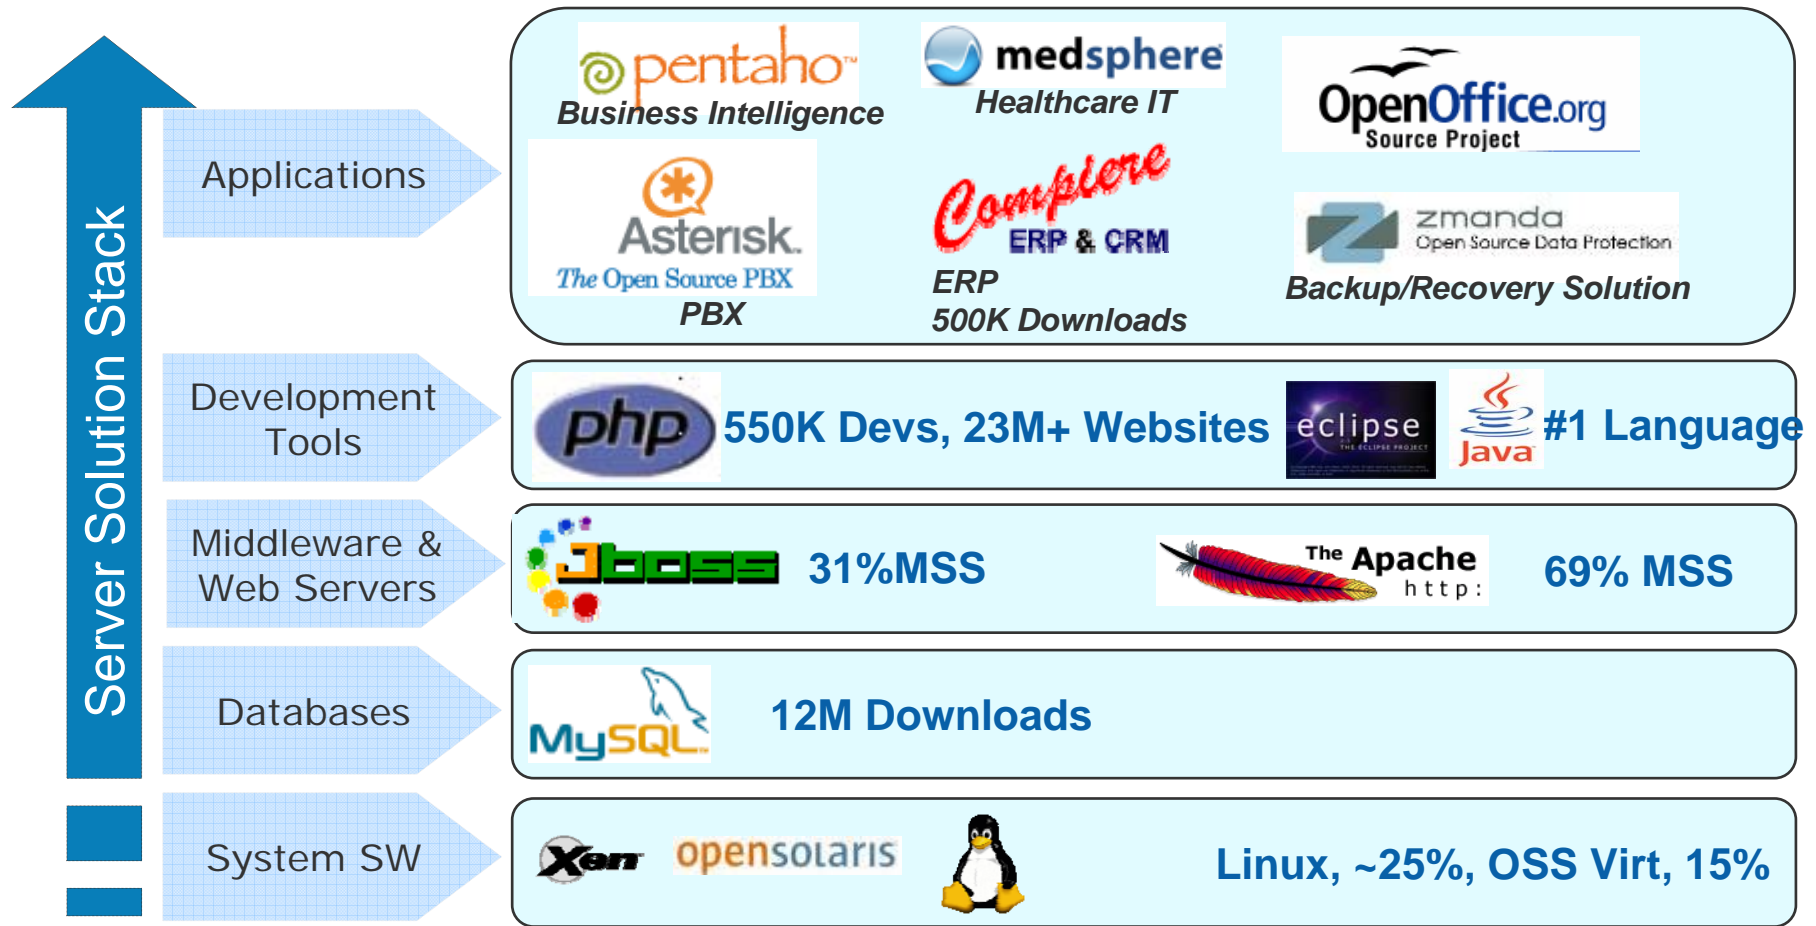

Netbooks, Nettops, AutoMP and more..

Common Elements:
Run the Internet, Low Power, Low Cost

Open Source is mainstream today

“By 2011, 80% of commercial SW will have OSS” - Gartner

Summary

- Open Source is one of the main Innovation focuses in Intel
- Intel has strong competency in Open Source
- Intel China is devoting its OSS effort to innovation
